

Montevallo Water & Sewer Board

Waste Water Treatment Plant Improvements

Planning, design, bidding, construction administration, and resident inspection of improvements to the existing Montevallo WWTP located in the City of Montevallo, Alabama, The project was necessary to meet strict nutrient limits placed on the plant's effluent because of the environmental sensitivity of the receiving stream. The project included:

- Administration Building
- Influent Pump Station
- Headworks • SBR System
- Tertiary filtration for solids and phosphorous removal
- UV Disinfection System
- Converting existing SBR basins to digesters

Approximate Project Cost: \$9.5 Million
